### **Description:**

Preparing for interpreting assignments seems simple enough, but there’s more to it than meets the eye. In this session I will discuss four different ways that interpreters can prepare themselves for specific assignments, as well as for all of the unexpected information we often deal with during assignments. Participants will be asked to create work samples before and after doing prep work, and to compare the quality of the interpretations.

### **Learning Outcomes:**

Participants will be able to:

- list three external sources to use for research
- list two new items for their Global Fund of Knowledge
- develop one framework for documenting pre-existing knowledge related to a specific topic.
