Additional or other filters can be created to meet specific needs; please see the Managing Filters guide for directions on how to create other filters.

Loading Filters

Once created, filters can be accessed from any screen that has an Employee Filter. To access a previously created filter:

1. Click **Employee Filter**
2. Click **Load**
3. Select a filter
4. Click **Filter**

A list of job classes associated with your school can be created by exporting an employee list from Munis Employee Inquiry.
