## DR. JOHN LONG MIDDLE SCHOOL

FALL 2023

### **EMPLOYEE AND STUDENT SURVEY RESULTS**

#### EMPLOYEE ENGAGEMENT

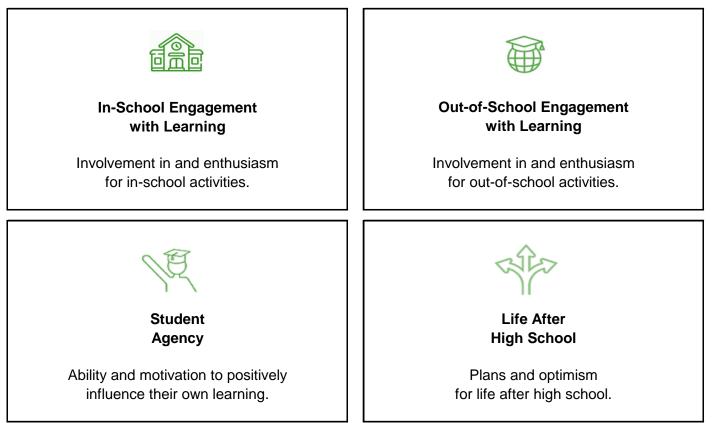

Gallup measures employee engagement based on responses to its Q<sup>12</sup> survey, which consists of 12 actionable workplace elements with proven links to performance outcomes.

"Engaged" employees work with passion and feel a profound connection to their employer. They drive innovation and move the organization forward. "Not Engaged" employees may be satisfied with their jobs, but they are not emotionally connected to their workplaces and are unlikely to devote much discretionary effort to their work. "Actively Disengaged" employees are dissatisfied with their workplaces and are likely to be spreading negativity to their coworkers.

#### **OE-GALLUP STUDENT POLL (OE-GSP)**

The OE-Gallup Student Poll (OE-GSP) is a survey with 21 core items. It measures in- and out-of-school engagement with learning, student agency, and plans and optimism for life after high school in students in 5th through 12th grades.

## Summary Snapshot

#### ENGAGEMENT WITH LEARNING

The summary below provides a snapshot of the average scores for In-School and Out-of-School Engagement with Learning. These averages, in addition to the Student Agency average, can provide a sense of how students perceive or experience engagement with learning and agency at your school. An average score of "1.00" would indicate the most negative student perceptions possible and an average score of "5.00" would indicate the most positive student perceptions. On most items, the most negative option is "strongly disagree" and the most positive is "strongly agree."

In-School Engagement with Learning Average

Out-of-School Engagement with Learning Average

The average of In-School Engagement items includes those listed in the first table on page 7.\*

# 3.45

The average of Out-of-School Engagement items includes those listed in the first table on page 8.\*

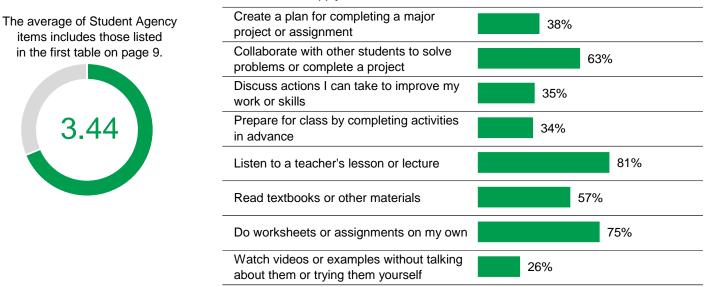

#### STUDENT AGENCY

The following items summarize student responses on items related to Student Agency.

#### Student Agency Average

Which of the following activities do you do *regularly* in your classes? *Select all that apply.* 

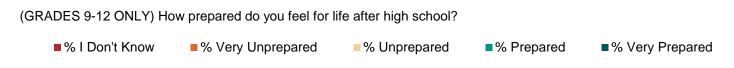

\*Items are reverse-coded for the calculation of the index averages because lower scores or negative responses for those items are the desirable outcome. For the In-School Engagement with Learning Average, the item "I'm always bored in my classes." is reverse-coded, and for the Out-of-School Engagement with Learning Average, the item "I only participate in after-school activities, like clubs or sports, because my parents or guardians want me to." is reverse-coded.

- Either a minimum n-Size of 10 is required to show results or no data is available.

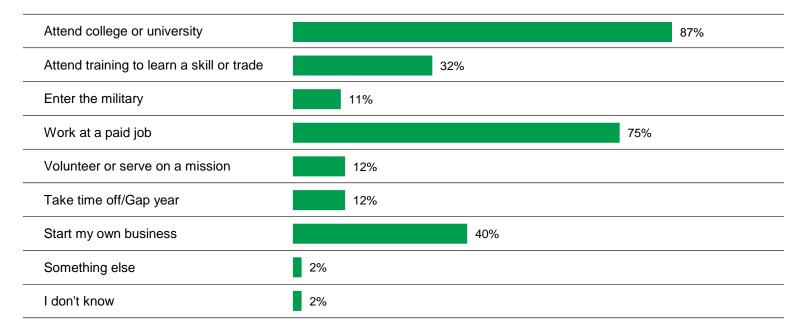

## Summary Snapshot (Continued)

The following items summarize high school students' responses on items related to Life After High School.

#### **POST-HIGH SCHOOL PLANS**

Which of the following are you interested in doing in the future? Select all that apply.

- Either a minimum n-Size of 10 is required to show results or no data is available.

Numeric values shown when percentages are 2% or higher.

## Purpose and Survey Methodology

The mission of the Pasco County Schools is "To provide a world-class education for all students." Achieving this mission requires that PCS is aware of the perceptions of employees and students, and that each employee and student see PCS as a great place to work and learn. PCS launched a partnership with Gallup in 2013 to measure employee and student perceptions and uses this information to make further progress toward achieving the PCS mission.

Based on more than four decades of research, Gallup has identified definitive employee attitudes that correspond with the most successful workplaces. Employee engagement — involvement with and enthusiasm for work — is measured by Gallup in a 12question employee survey. An employee's level of engagement links to various school outcomes, including employee retention, parent engagement, student retention, and student achievement. The employee engagement survey was conducted online from Oct. 2 through Oct. 13, 2023, with 7,319 PCS employees registering their opinions (69% response rate).

The OE-Gallup Student Poll is a survey with 21 core items. It measures in- and out-of-school engagement with learning, student agency, and plans and optimism for life after high school in students in 5th through 12th grades. The OE-Gallup Student Poll was conducted online during the school day from Sep. 25 through Oct. 27, 2023, with over 28,269 PCS students completing the survey.

Both of these surveys have yielded a wealth of data designed to inform PCS improvement efforts. Ongoing dialogue will continue with teams of employees across PCS as we continue to leverage insights from these data to drive success.

The results provide a comprehensive view of school-level data collected from the employee and student surveys. Please note the following:

- O The employee survey results are reported at the school level, and also include the PCS districtwide results.
- O The student survey results are shown at the school level, and also include PCS level-alike reports (e.g., all PCS high schools).
- O The student survey is only available for students in grades 5-12. Although survey participation in the elementary schools is limited to students in the upper grades, discussions about in- and out-of-school engagement with learning and student agency apply to all students.
- O School leaders are encouraged to approach the action planning process with school improvement needs and responses of both employees and students in mind. Many of the best examples of school leaders building great places to work and learn rely on integrating relatively simple actions into daily conversations.

These data are at the foundation of many important discussions and actions being taken throughout PCS. We look forward to leveraging insights from these results as we work to achieve our important mission.

# Appendix

#### SHARING THE RESULTS

We encourage schools to share their OE-GSP results with key stakeholders. Below are some guidelines for the use and release of school and district data and results.

- You can share the participation results for your school and/or district. The n-Size represents the total number of respondents for your school or district. Your school or district participation rate is based on the total number of eligible students in your school or district. Students in 5th through 12th grade are eligible to participate in the survey.
- When sharing results, please include the limitations of polling.
- Be cautious when interpreting your data or comparing results to another school or district. The data are not representative of the U.S. population of students in 5th through 12th grade, and may not be fully representative of your school or district's students.
- When you share results, you may also want to provide information about how your school will use or has used the data to identify focus areas for improvement and actions to increase student engagement.

#### LIMITATIONS OF POLLING

The data are not statistically weighted to reflect the U.S., Florida, district-specific, or school-specific student populations, and the sample is subject to non-response bias as there may be systematic reasons why some students responded to the survey but not others. Therefore, local schools and districts should interpret the data with the sample of student respondents in mind. School and district data and scorecards provide meaningful data for local comparisons and may inform strategic initiatives and programming, though the results are not generalizable beyond the participating school or district.
