Message from the Superintendent

The 2010-2011 school year is off to a great start, as we have a strong team of talented educators working throughout our schools every day. We are eager to partner with you to make this a successful school year for your child. One important way we can work together to maximize your child's potential is to reinforce the expectation of good attendance. When students prioritize being at school on time, they are more likely to have a successful experience. We appreciate your help in achieving this important goal.

Our theme for the year is *Learning in the 21st Century*. You will notice an emphasis on the integration of technology into your child's learning as we strive to prepare all students for the challenges of tomorrow and provide equitable access to the tools he or she will need for success. Additionally, our focus is on developing the 21st Century Literacy skills that are needed in our ever-changing world. We want to help our students become better problem solvers, engaged in the world around them and equipped with the critical thinking skills that are needed for analyzing, developing innovative solutions and sharing their creativity with others. Today's students are tomorrow's leaders and we are fostering a supportive learning environment that will help them to reach their dreams.

As we immerse students in an enriching educational environment, we will be expanding the availability of digital learning content. With the use of these resources comes the need for a higher level of personal responsibility for students. We want to help your child develop an understanding of how to navigate online resources in a responsible and safe manner. As part of the cultivation of those skills, we will enforce high expectations that all students will appropriately use these tools to enhance their education. Your help in reminding your child to use technology in an appropriate manner would be greatly appreciated.

As you are probably aware, our District still faces significant financial challenges. In addition to a third consecutive year of multi-million dollar budget shortfalls, districts throughout the state are required to implement the final phase of the class size amendment this year. Despite these challenges, we remain committed to prioritizing the needs of students and ensuring a high quality educational experience for the children of Pasco County.

Again, thank you for your support of our school district. We look forward to working with you to maximize your child's success this year.

Message from the Principal

Our teachers engage in professional development, dialogue, research, and reflection to refine teaching practices that develop students into strong communicators, problem solvers, and thinkers. Staff are proactive in maintaining a safe, orderly, drug-free environment. We focus on data analysis to close the achievement gap and create opportunities to integrate technology into the curriculum to engage and motivate our students to better prepare them for a technology rich world. Gator families are invited to be a part of our team as we work to increase student achievement through family workshops and fun events. We earned the Golden School Award for volunteer participation helping us build a strong school community that is "Gator-rific!"

School Mission Statement

Gulf Highlands Elementary will provide a safe, positive environment that will focus on the success of each child, inspiring lifelong learning.

School Improvement Plan 2010-2011

All members of the GHES community worked together to implement the strategies of our School Improvement Plan. We hosted Books-A-Million Night, Camp Read-A-Lot, Science Fair Night, three math nights, and two writing nights allowing us to connect academic content with family interaction. Fifty-nine percent of our students met high standards in reading, forty-three percent met the standards in math, and eighty-six percent met the standards in writing. Unfortunately, we did not meet the criteria for Adequate Yearly Progress indicating the need to review student data with more intensity, continue to research best teaching practices, and provide staff development in these areas to accomplish these goals.
