Message from the Superintendent

The 2010-2011 school year is off to a great start, as we have a strong team of talented educators working throughout our schools every day. We are eager to partner with you to make this a successful school year for your child. One important way we can work together to maximize your child's potential is to reinforce the expectation of good attendance. When students prioritize being at school on time, they are more likely to have a successful experience. We appreciate your help in achieving this important goal.

Our theme for the year is *Learning in the 21st Century*. You will notice an emphasis on the integration of technology into your child's learning as we strive to prepare all students for the challenges of tomorrow and provide equitable access to the tools he or she will need for success. Additionally, our focus is on developing the 21st Century Literacy skills that are needed in our ever-changing world. We want to help our students become better problem solvers, engaged in the world around them and equipped with the critical thinking skills that are needed for analyzing, developing innovative solutions and sharing their creativity with others. Today's students are tomorrow's leaders and we are fostering a supportive learning environment that will help them to reach their dreams.

As we immerse students in an enriching educational environment, we will be expanding the availability of digital learning content. With the use of these resources comes the need for a higher level of personal responsibility for students. We want to help your child develop an understanding of how to navigate online resources in a responsible and safe manner. As part of the cultivation of those skills, we will enforce high expectations that all students will appropriately use these tools to enhance their education. Your help in reminding your child to use technology in an appropriate manner would be greatly appreciated.

As you are probably aware, our District still faces significant financial challenges. In addition to a third consecutive year of multi-million dollar budget shortfalls, districts throughout the state are required to implement the final phase of the class size amendment this year. Despite these challenges, we remain committed to prioritizing the needs of students and ensuring a high quality educational experience for the children of Pasco County.

Again, thank you for your support of our school district. We look forward to working with you to maximize your child's success this year.

Heather Fiorentino
Superintendent

Heather Fiorentino, Superintendent of Schools

Message from the Principal

Moon Lake Elementary School, home of the Manatees, serves students from Pre-K to Grade 5. Utilizing the district philosophies of continuous progress, continuity of caring, and equity and excellence for all students, multi-grade teams provide instruction and support to all students. While academic excellence is a priority at Moon Lake Elementary School, the social and emotional growth of each child is equally important. Numerous enrichment activities are planned throughout the school year for students to share their learning and talents. Some of those activities include: the Tropicana Speech Contest, the Great American Teach In, Choral Performances, Clubs, Special Olympics, and Field Days. The Parent Involvement program provided numerous opportunities for parents to become actively involved with the school. Our school earned the Five Star School Award in recognition of our parent and community involvement.

School Mission Statement

Our mission is to provide a safe, stimulating, and flexible learning environment where children and adults can effectively develop the skills necessary to become lifelong learners and productive citizens in a global society.

Learning Environment

The District School Board of Pasco County provides an environment conducive to teaching and learning.

School Improvement Plan 2010-2011

The School Improvement Plan for 2010-2011 addressed the academic areas of reading, writing, math, and science. In reading, teachers used the Problem Solving/Response To Intervention approach to make academic decisions based on data as well as implemented the Treasures reading curriculum. Teachers focused on the Writer's Workshop and the Six Traits of Writing to improve students' writing. The FAIR Assessment was given in all grades in reading and provided important data to teachers regarding students' mastery of standards. In math and science, a benchmark assessment was given to students in grades two-five to track their mastery of the standards. Professional Learning Communities met weekly and analyzed student data in all content areas. All teachers were trained in Learning Focused Strategies and implemented those strategies in reading, writing, math and science. These strategies, in addition to the hard work of students, parents and staff, resulted in 70 percent of our students meeting high standards in reading and 64 percent of our students meeting high standards in math.

Help Keep Your School Safe

Report drugs, guns, weapons, violence, bullying, and other criminal activities.
