

ESE Program Boundaries 2015-2016

This document is intended to identify schools with specialized programs for students with disabilities. In order to use the document, find the zoned school in the left column and track across the row to find the ESE program school with the required ESE program.

Descriptions of ESE Programs

All of the ESE programs serve students with a variety of ESE eligibility labels within each type of setting. The program names specify the types of ESE supports available in that ESE program.

Access Curriculum Program: Independent (ACP-I) offers curriculum based on the access points and supports for students with mild/moderate behavioral needs.

Access Curriculum Program: Supported/Participatory (ACP- S/P) offers a curriculum based on the access points for students with more significant cognitive needs and supports for mild/moderate behavioral needs.

Access Social Behavior Program (ASBP) offers curriculum based on the access points for students with generally more significant cognitive needs and supports for severe/continuous behavioral needs. Students at the independent level may also receive supports at CRES, CLMS, HHS, or WCHS. Contact a program supervisor for boundary.

Developmental Pre-Kindergarten (DPK) offers a program for students with significant cognitive needs and a range of behaviors from mild to severe. DPK programs that also offer skilled medical supports may not be appropriate for students with severe behavior needs (e.g., CENES, COES, CRES, and NWES).

Deaf/Hard of Hearing – Itinerant services provided at the student's zoned schools. Students needing daily intensive auditory oral supports attend SOES and students needing daily intensive manual communication supports attend DOES.

Pre-Kindergarten Communication offers a program to develop communication for students with moderate to severe language delays.

Pre-Kindergarten Varying Exceptionalities (PK VE) offers a program to address the needs of students with developmental delays in multiple areas.

Self-Contained Academic (SCA) offers a program based on the Florida Standards for students with significant delays in academic skills and supports for mild/moderate behavioral needs.

Skilled medical supports are offered to students requiring these services (e.g. tube feeding, suctioning, etc.) either in the ESE classroom or in the general education setting.

ESE Program Boundaries 2015-2016

Social Behavior Communication Program (SBCP) offers a program based on the Florida Standards for students with moderate/severe behavior and communication needs.

Social Behavior Program (SBP) offers a program based on the Florida Standards for students with moderate/severe behavior needs.

Therapeutic Pre-Kindergarten (TPK) offers a program to address the behavioral needs of students with severe social/emotional delays.

Visual Impairments – Itinerant services provided at the student's zoned schools or in an ESE program school.

For school noted with a *** mark, please contact the program area supervisor to determine the boundary school.
