District School Board of Pasco County
Guidelines for Administration of Medication at School

Guidelines:

1. Administration of medication during school hours should occur only when medication schedules cannot be adjusted to provide for administration at home.

2. Medication will be administered by personnel trained by the registered professional school nurse.

3. Medication must be brought to school by the parent / guardian in the original prescription container with the original prescription label containing the following information:
   a. Student’s name
   b. Name of medication (only regulated medications will be administered at school, i.e. no herbal medications).
   c. Dosage prescribed (if the dosage changes, a new prescription bottle must be provided)
   d. Time of day to be taken
   e. Physician’s name
   f. Special instructions
   g. Date of prescription (current, within one year)

4. No more than a month’s supply of medication should be brought to school at one time.

5. Medication received must be counted by 2 people (preferably the parent and a school employee), and the amount and date received is to be recorded on the individual “Student Medication Record”.

6. A written statement (“Authorization for Medication Administration”) must be completed by the parent / guardian, granting the school permission to assist in the administration of such medication and which shall explain the necessity for such medication to be provided during the school day, including any occasion when the student is away from school property on official school business.

   *Note: The parent / guardian is expected to obtain the needed dose/doses of medication for field trips in a separate, appropriately labeled prescription container, or the entire bottle of medication may be sent with a trained person to be administered on the field trip. Under no circumstances may medication be transferred from one container to another by anyone other than a registered pharmacist (i.e. no pills are to be placed in envelopes or baggies).

7. Regulated, non-prescription medication will not be administered at school, unless accompanied by a physician’s statement, dated within the current school year (exception: Healthy Student Program).

8. Students will be allowed to carry and self-administer metered dose asthma inhalers, pancreatic enzyme supplements, and epinephrine auto-injectors with written authorization from their parent / guardian and physician. (F.S.1002.20 (3) (h), (i), and/or (k)).

9. Students will be allowed to carry and self-administer diabetic supplies, medication, and equipment with written authorization from their parent / guardian and physician (F.S.1002.20 (3) (j)).

10. No prescription analgesic narcotics will be administered at school.

11. Parental and healthcare provider authorization for the administration of medications and treatments is required annually.

12. When medication is discontinued and/or is not picked up by the parent at the end of the school year, it shall be destroyed.
