

# FALL 2014

## JAMES IRVIN EDUCATION CENTER

### GALLUP STUDENT POLL RESULTS

## INTRODUCTION

THANK YOU FOR PARTICIPATING IN THE GALLUP STUDENT POLL!

The Gallup Student Poll is a 20-question survey that measures the hope, engagement, and well-being of students in grades 5-12. The primary application of the Gallup Student Poll is as a measure of non-cognitive metrics that predicts student success in academic and other youth development settings. Gallup's research has shown that hope, engagement, and well-being are key factors that drive students' grades, achievement scores, retention, and future employment.

### HOPE

# 30%

HOPEFUL

The ideas and energy we have for the future drives effort, academic achievement, credits earned, and retention of students of all ages.

### ENGAGEMENT

# 26%

ENGAGED

The involvement in and enthusiasm for school reflects how well students are known and how often they get to do what they do best.

### WELL-BEING

# 43%

THRIVING

How we think about and experience our lives tells us how students are doing today and predicts their success in the future.

AS YOU REVIEW YOUR SCORECARD, USE THE FOLLOWING QUESTIONS TO HELP INTERPRET THE DATA.

- What is the biggest highlight on your Gallup Student Poll scorecard?
- What result on the Gallup Student Poll scorecard most concerns you?
- In addition to the highlight and biggest concern, what is the one finding you want to share with the broader community?

- No data available

## APPENDIX

### SHARING YOUR GALLUP STUDENT POLL RESULTS

Gallup encourages you to share your Gallup Student Poll results with your local community and key stakeholders. Below are some guidelines for the public release of school, district, and the overall convenience sample data and results.

- You may share the Gallup Student Poll participation results for your school and/or district. The total number of respondents from your school or district is represented by the well-being n size on the scorecard. Your school or district participation rate is based upon the total number of eligible students in your school. Students in grades 5 through 12 are eligible to participate in the Gallup Student Poll.
- Please include the Gallup Student Poll methodology and limitations of polling. If most eligible students in grades 5 through 12 were polled, the district (or school) may indicate that the data represents a census.
- Please do not compare your school or district's data to the overall line of data on your scorecard when publicly sharing results. Since the overall data found in your school or district report is an aggregate of a convenience sample of all schools and districts that opted to participate in the Gallup Student Poll within that survey year, the data are not representative of the U.S. population of students in grades 5 through 12 and are thereby not fit for data comparisons.
- Communicate ranges in data across schools within the district.
- You may share district or school plans to utilize the data to inform strategies and focus.

If you would like more information on how to publicly share Gallup Student Poll data, please email Gallup at [Studentpoll@gallup.com](mailto:Studentpoll@gallup.com).

### GALLUP STUDENT POLL METHODOLOGY

The annual Gallup Student Poll is offered at no cost to public schools and districts in the United States. The online poll is completed by a convenience sample of schools and districts each fall. Schools participating in the annual Gallup Student Poll are not randomly selected and are neither charged nor given any incentives beyond receipt of school-specific data. Participation rates vary by school. The poll is conducted during a designated survey period and available during school hours Tuesday through Friday only. The Gallup Student Poll is administered to students in grades 5 through 12. The primary application of the Gallup Student Poll is as a measure of non-cognitive metrics that predicts student success in academic and other youth development settings.

The overall data from the annual administration of the Gallup Student Poll may not reflect responses from a nationally representative sample of students, and the overall data are not statistically weighted to reflect the U.S. student population; thereby, overall data and scorecards should be used cautiously by local schools and districts as a data comparison. School and district data and scorecards provide meaningful data for local comparisons and may inform strategic initiatives and programming, though the results are not generalizable beyond the universe of the participating school or district.
